DETAILED ACTION

1. The following is a non-final office action upon examination of application number 09/871279. Claims 1, 6, 13-21 and 24 are pending and have been examined on the merits discussed below.

Response to Arguments

2. Applicant's arguments, filed 10/14/08, with respect to rejections of claims 1, 6, 13-21 and 24 under 35 USC 103(a) have been fully considered and are persuasive. The rejections under 35 USC 103(a) of claims 1, 6, 13-21 and 24 have been withdrawn.

3. In light of recent Supreme Court precedent and recent Federal Circuit decisions, the claims warrant new rejections under 35 USC 101. These rejections are presented below.

4. New rejections under 35 USC 112 are also included.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claims 1, 13, 14, 22 are rejected as being directed toward non-statutory subject matter because they are software per se. Claims recite "a communication device and an interactive voice recognition unit" as well as a several elements that appear to be software modules or computer programs. The current claim language does not specify the software is part of or statically embodied in a physical medium. Software not statically embodied on a physical

Art Unit: 3624

medium are considered descriptive material per se. As drafted, the claim fails to define any structural and functional interrelationships between the software per se and other elements of the invention that permit the software's function to be realized. (See MPEP § 2106 Section IV B 1 (a)).

7. Claims 6, 15-18 and 24 are rejected under 35 U.S.C. 101. Based on Supreme Court precedent and recent Federal Circuit decisions, the Office's guidance to examiners is that a § 101 process must (1) be tied to another statutory class (such as a particular apparatus) or (2) transform underlying subject matter (such as an article or materials) to a different state or thing. *Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780, 787-88 (1876).

An example of a method claim that would not qualify as a statutory process would be a claim that recited purely mental steps. Thus, to qualify as a § 101 statutory process, the claim should positively recite the other statutory class (the thing or product) to which it is tied, for example by identifying the apparatus that accomplishes the method steps, or positively recite the subject matter that is being transformed, for example by identifying the material that is being changed to a different state.

Here, applicant's method steps fail the first prong of the new Federal Circuit decision since they are not tied to another statutory class and can be performed without the use of a particular apparatus. Thus, claims 6, 15-18 are non-statutory since there is no tie to a specific computer apparatus.

Claims 19-21 are rejected as being directed toward non-statutory subject matter under 35 USC 101. The recited claims are system claims depending from method claims thereby claiming two separate statutory classes. The claims are directed to neither a “process” nor a “machine,” but rather embraces or overlaps two different statutory classes of invention set forth in 35 U.S.C. 101 which is drafted so as to set forth the statutory classes of invention in the alternative only. *Id.* at 1551

Claim Rejections - 35 USC § 112

8. Claim 13 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 13 is directed to a system, but it is not clear from which claim it depends. Claim 12 was previously cancelled.

9. Claims 19-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The recited claims are directed to a system, but the claims from which they depend are method claims.
